

Term 6 - Week 6 - 06.07.20

Making Sure:

1. Use these notes to write four paragraphs about the development of swimming.

Paragraph 1: Animals - natural swimmers - humans are not - had to learn - watched and imitated animals

Paragraph 2: Noticed how dogs swam - imitated "dog paddle" - developed breaststroke - co-ordinates arm and leg movements better

Paragraph 3: Next development - sidestroke - used scissor kick - developed overarm stroke to accompany it - greater speed than breaststroke or dog paddle

Paragraph 4: 1902 - Richard Cavill - introduced crawl from Australia - first called Australian crawl - fastest stroke - now most popular stroke

2. Imagine that you are a famous explorer. You want to reach the temple of tears, but first you have to pass through some dangerous country. Write a separate paragraph about each section of your journey,

The jungle: There are 25 mile of thick jungle to be cut through. Inhabiting the jungle are a variety of dangerous animals, as well as many poisonous snakes.

The river: After this, you have to get across the wide, fast flowing, muddy river. There is no bridge, but there are many hungry crocodiles.

The mountain: The Temple is at the top of the mountain, which has steep, rocky sides, requiring ropes to climb them. Another problem is the danger of frequent landslides.

The Temple: Once you get to the Temple you still have to find a way in. Its walls are high and smooth and its doors are heavy and impossible to open. There are no windows, but there is talk of invisible guardians who keep its secrets.
